

## The First Lean Multimodality Reporting Workflow

The Influx Workflow Solution is based on proven “Lean” management principles providing unparalleled efficiency, quality and return on investment

### Revolutionary Lean Workflow

- Manage all imaging modalities in a single vendor neutral ‘Lean’ workflow
- Seamlessly transfer measurement data and images for review
- Single, intuitive workspace for physicians and staff
- Real time report generation using an intuitive "Influx Reporting Engine"
- Automated export of finalized reports to your information system

### Analytics

- Intelligent analytics providing timely insights
- Access to real time and accurate data your managers need

### Proven Cost Savings

- Reduces your hard costs with our paperless workflow
- Reduces errors that cost time and dollars to identify and correct
- Reduces time spent on wasteful manual tasks including data transcription
- No document movement, scanning, faxing, shredding or storage
- Reduces report turn around time: realize the capability of same day reporting!

### Return on Investment

- Elevates productivity
- Most clients realize a return on investment of less than 18 months
