

## The First Multimodality Cardiovascular Reporting Solution

### Multimodality Workflow

- Support all modalities including EKG, Stress, Holter, Loops, AMBP, Nuclear
- Single efficient workflow for all modalities
- Unique intuitive workspace
- One step secure signature and finalize

### Reports Enhanced

- Specific templates for each test type
- Thousands of test specific finding codes
- High quality diagrams with segment scoring
- Patient data autopopulates report
- Measurement data imported automatically
- Calculations on report (ie Duke Treadmill Score)

### Integrated Report Viewer

- Fully integrated viewer and report generator with images, videos, and report on one screen
- Rapid navigation via user selected thumbnails
- Pan and Zoom image capability

### Deliver Reports Seamlessly

- Export high quality PDF reports
- Send reports directly to information systems

### Analytics

- Intuitive real time dashboard
- Searchable with useful filters (test, operator, etc)

- Watch our video 'What is Influx?'
- View a product demonstration
- Try our Influx 'Efficiency Calculator'
- Book a demo
